

## Customizing Wings theme.php file

The following is a guide that covers how to customize your new Wings theme by editing the theme.php file. Here you can find an overview of the variables included in this file and instructions on how to use.

### Theme.php

Use your preferred code editor program and open wings/theme.php file.

```
21  $themename = "Wings Dark";
22  $themeversion = "1.0";
23  $themeauthor = "Corllete Lab";
24  $themeemail = "support@free-source.net";
25  $themewebsite = "http://free-source.net";
26  $themedate = "07/2008";
27  $themeinfo = "";
28
29  $xhtmlcompliant = TRUE;
30  $csscompliant = TRUE;
31  define("STANDARDS_MODE", TRUE);
32  define("NEXTPREV_NOSTYLE", "1");
33  define("IMODE", "lite");
34  define("USER_WIDTH", "width:100%");
35
```

Now you need to edit the lines between

```
/****** THEME CUSTOMIZATION *****/
/****** BEGIN *****/

// PAGE
define("FS_SITE_WIDTH", 1000);
define("FS_LEFT_MENU_WIDTH", 230);
define("FS_RIGHT_MENU_WIDTH", 200);
define("FS_CONTENT_PADDING", 0);
define("FS_CENTER_PADDING", 18);
define("FS_NEWS_PADDING", 18);

// NEWS
define('FS_NEWS_NO_IMAGE', SITEURLBASE.THEME_ABS.'images/0908_menu-center-ico.png');
define('FS_NEWS_IMAGE_SMALL_WIDTH', 180);
define('FS_NEWS_IMAGE_SMALL_HEIGHT', 135);
define('FS_NEWS_IMAGE_LARGE_WIDTH', 240);
define('FS_NEWS_IMAGE_LARGE_HEIGHT', 180);

// FS SITELINKS SETTINGS
define("FS_LINK_SEPARATOR", '<!-- -->');
define("FS_START_SEPARATOR", FALSE);
define("FS_END_SEPARATOR", TRUE);
```

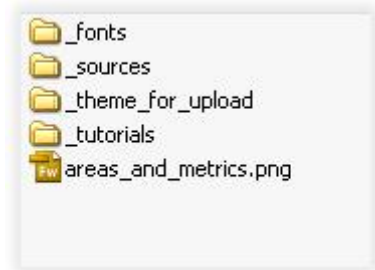

```
// FBOX SETTINGS
define("FB_AUTO_ROTATE", FALSE); // --> TRUE or FALSE
define("FB_FREQUENCY", 6); // --> if FB_AUTO_ROTATE set to true, define this in seconds
define("FB_DURATION", "0.4"); // --> rotate duration in seconds

/*****
THEME CUSTOMIZATION
*****/
```

## Page layout settings

To understand how this variables can change your site layout open "[areas\\_and\\_metrics.png](#)". Based on this settings the theme.php will automatically set a the sizes of the left, center and right columns, as well the menu areas.

```
// PAGE
define("FS_SITE_WIDTH", 1000);
define("FS_LEFT_MENU_WIDTH", 230);
define("FS_RIGHT_MENU_WIDTH", 200);
define("FS_CONTENT_PADDING", 0);
define("FS_CENTER_PADDING", 18);
define("FS_NEWS_PADDING", 18);
```

## News layout settings

For this variables to work you need to install "Corllete Lab Gallery v2.06". With this variables you can define the thumbnailing sizes for your news images. You don't need to care about image sizes -you just upload your news images to your site and the script will automatically resize them to the sizes given below.

```
// NEWS
define('FS_NEWS_NO_IMAGE', SITEURLBASE.THEME_ABS.'images/0908_menu-center-ico.png');
define('FS_NEWS_IMAGE_SMALL_WIDTH', 180);
define('FS_NEWS_IMAGE_SMALL_HEIGHT', 135);
define('FS_NEWS_IMAGE_LARGE_WIDTH', 240);
define('FS_NEWS_IMAGE_LARGE_HEIGHT', 180);
```

### **FS\_NEWS\_NO\_IMAGE**

Define the default image if for some reason the news image can't be found

### **FS\_NEWS\_IMAGE\_SMALL\_WIDTH**

Define the image width - used on news front pages

### **FS\_NEWS\_IMAGE\_SMALL\_HEIGHT**

Define the image height - used on news front pages

### **FS\_NEWS\_IMAGE\_LARGE\_WIDTH**

Define the image width - used on extended news pages

### **FS\_NEWS\_IMAGE\_LARGE\_HEIGHT**

Define the image height - used on extended news pages

## FS Sitelinks settings

The custom shortcode {FS\_SITELINKS} is written by Free-Source.net for displaying your site links in a menu bar with 4 sub levels links as a drop-down list. This settings are for the links separator only.

This shortcode will render all links with render type **"1-Main"**.

To create links go to your Administration area on your site. In the Menu at the top, go to **Settings > Site Links**. Next press **"Create New Link"** button. On the next screen enter all information about the link and from the **"Link Rendertype:" drop-down list choose "1-Main"**

```
// FS SITELINKS SETTINGS
define("FS_LINK_SEPARATOR", '<!-- -->');
define("FS_START_SEPARATOR", FALSE);
define("FS_END_SEPARATOR", TRUE);
```

A screenshot of a navigation menu bar with a dark background and light text. The menu items are: Home, Downloads, Drop Down Links, Members, Gallery, Forum, and Contact Us. Each item has a small downward-pointing arrow to its right. A red circle is drawn around the 'Home' link and its arrow.

Home ▾ Downloads ▾ Drop Down Links ▾ Members ▾ Gallery ▾ Forum ▾ Contact Us ▾

## Corllete Lab Feature Box Settings

Wings theme contains a custom template for the "Corllete Lab Feature Box v1.0" plugin. For this to work you need to have the plugin installed. The custom template is used for scrolling the FBox items.

```
// FBOX SETTINGS
define("FB_AUTO_ROTATE", FALSE); // --> TRUE or FALSE
define("FB_FREQUENCY", 6); // --> if FB_AUTO_ROTATE set to true, define this in seconds
define("FB_DURATION", "0.4"); // --> rotate duration in seconds
```
